

Innovasea Nominated for Discovery Award in Innovation for Tiny V3 Fish Tracking Transmitter

BOSTON – Innovasea, a global leader in technologically advanced aquatic solutions for aquaculture and fish tracking, has been chosen as one of three finalists for the 2022 Discovery Award in Innovation for the development of its tiny V3 fish tracking transmitter. The winner will be announced next week in Halifax, Nova Scotia.

The V3 transmitter next to a pharmaceutical caplet.

In creating the V3 tag, Innovasea devised a way to make its industry-leading acoustic telemetry technology even smaller while ensuring it had a strong enough battery to power the tags for an extended period of time.

"It's an honor to be nominated for a Discovery Award for the technology breakthroughs that led to the creation of our V3 tag," said Mark Jollymore, president of Innovasea. "Innovation is at the heart of what we do at Innovasea, and this nomination is a testament to the many people whose creativity, hard work and long hours brought the V3 from concept to reality."

Smaller than a pharmaceutical caplet, the V3 is ideal for noisy freshwater environments like those found around barriers, dams and fish passage systems. It also gives researchers and scientists the ability to study both smaller species of fish and larger species that are at earlier stages of their lifecycle.

The Discovery Awards are in support of the Discovery Centre in Halifax and celebrate outstanding innovators whose game-changing achievements in science and technology put Nova Scotia at the forefront of global innovation.

The Innovation Award is intended to recognize a team or individual who saw the commercial potential of a concept/research and applied innovative business practices, combined with the strategic investment of time and money, to bring it to the market.

The 20th Annual Discovery Awards will be awarded November 23 at the Halifax Convention Centre and are proudly co-presented by Saint Mary's University and Dalhousie University. For more information, visit discoveryawards.ca.

“Innovation is at the heart of what we do at Innovasea, and this nomination is a testament to the many people whose creativity, hard work and long hours brought the V3 from concept to reality.”

– Innovasea President Mark Jollymore

About Innovasea

Fueled by leading-edge technology and a passion for research and development, Innovasea is revolutionizing aquaculture and advancing the science of fish tracking to make our oceans and freshwater ecosystems sustainable for future generations. With more than 275 employees worldwide, we provide full end-to-end solutions for fish farming and aquatic species research – including quality equipment that’s efficient and built to last, expert consulting services, and innovative platforms and products that deliver unrivaled data, information and insights.
