

Innovasea Names Jorge Bravo Managing Director of Chile

Innovasea, a global leader in technologically advanced aquatic solutions for aquaculture and fish tracking, announced today the promotion of Jorge Bravo to Managing Director of its Chilean operations.

Bravo, who joined Innovasea in 2020 and most recently served as the company's Technical Manager for Chile, steps into the position having previously played a major role in launching and expanding Innovasea's Chilean operations.

"Jorge has consistently proven himself as a leader and shown a strategic, results-oriented mindset that has been instrumental in driving our Chilean success," said Innovasea Vice President of Aquaculture, Marc Turano. "I'm confident he will continue to elevate the role and foster meaningful relationships across the region."

As Managing Director, Bravo will oversee Innovasea's operations, strategy and performance in Chile. Key priorities will include ensuring the area's fish farms enjoy high-quality solutions and ongoing support today, while also collaborating with them to continue developing innovative, high-impact offerings that will advance the country's salmon industry.

A cornerstone of this effort will be working closely with farms to better understand pressing issues, technology gaps, and opportunities that will guide Innovasea's ongoing research and development. These solutions will complement and enhance Innovasea's existing suite of reliable, precision aquaculture technology, including the biomass estimation solution ([BiomassPro](#)) and environmental sensors ([aquaMeasure](#)).

"I'm excited to partner with local farms, making them an integral part of the country's long-term success," added Bravo. "Through this collaboration, we'll be able to better tailor state-of-the-art solutions that effectively meet their needs and deliver sustainable, long-term growth."

Bravo earned his bachelor's degree in Mechanical Engineering from the Universidad Simón Bolívar and his MBA from the Universidad San Sebastián.

About Innovasea

Fueled by leading-edge technology and a passion for research and development, Innovasea is revolutionizing aquaculture and advancing the science of fish tracking to make our oceans and freshwater ecosystems sustainable for future generations. With more than 275 employees worldwide, we provide full end-to-end solutions for fish farming and aquatic species research – including quality equipment that's efficient and built to last, expert consulting services, and innovative platforms and products that deliver unrivaled data, information, and insights.
