Innovasea Encouraged by NOAA's Designation of the First Two Aquaculture Opportunity Areas in the U.S.

BOSTON – [Innovasea](#), a global leader in technologically advanced aquatic solutions for aquaculture and fish tracking, said today that it is pleased to see the National Oceanic and Atmospheric Administration designate [the federal waters of Southern California and in the Gulf of Mexico as aquaculture opportunity areas](#).

"Today's announcement by NOAA is an important signal that the United States is serious about allowing offshore aquaculture to establish itself as an industry and help complement our capture fisheries by producing seafood in a safe, sustainable manner," said David Kelly, CEO of Innovasea.

About Innovasea

Fueled by leading-edge technology and a passion for research and development, Innovasea is revolutionizing aquaculture and advancing the science of fish tracking to make our oceans and freshwater ecosystems sustainable for future generations. With 250 employees worldwide, we provide full end-to-end solutions for fish farming and aquatic species research – including quality equipment that's efficient and built to last, expert consulting services, and innovative platforms and products that deliver unrivaled data, information and insights.
