

Innovasea Relocates Chilean Office to Expanded Facility in Puerto Varas

Innovasea, a global leader in technologically advanced solutions for aquaculture and fish tracking, today announced it has relocated its Chilean office to a new address. The building, which remains located in Puerto Varas, features expanded office and laboratory space designed to better support the team's growing business and operations.

"We are excited to have set up this location right outside the heart of Puerto Varas with improved facilities and accessibility," said Jorge Bravo, Innovasea's Managing Director for Chile. "It offers a great base to serve our clients, offering a space that allows us to operate with greater proximity, agility and efficiency."

The new is located at the following address:

Av. Gramado, Pasaje Beyer, Parcela Número Seis,
Línea Vieja, Puerto Varas, Los Lagos
5550000, Chile

Innovasea's Chilean offerings focus on delivering simple, effective, and dependable solutions that enable salmon farmers to track and improve operations through precise data. From water quality to biomass estimation, each solution is designed to fit seamlessly into daily workflows.

This data can then be accessed anywhere from the precision aquaculture platform, allowing for more control over growing conditions while reducing the number of trips needed to the pens.

For more information on Innovasea's complete suite of offerings, designed for the needs of salmon farmers, visit www.innovasea.com/chile.

About Innovasea

Fueled by a commitment to a more sustainable future, Innovasea is at the forefront of pioneering solutions that transform our industry, protect the oceans, and feed our world. With more than 250 employees worldwide, we deliver fully integrated aquaculture and fish tracking offerings. Enhanced by our expert consulting services and innovative, integrated platforms, we empower users to get the most out of their equipment. All of it supports our vision for healthier oceans, plentiful fish, and truly regenerative aquaculture.
