

Innovasea's farm management solution, Farm360, is an easy-to-use, cloud-based software platform that gives users complete control and better understanding of their aquaculture operations through accurate, up-to-date tracking and monitoring of farm activities and performance related to feeding, fish health and environmental conditions.

Use cases:

- Businesses seeking **better control of farm operations** through the use of monitoring technology and real-time data.
- Operators wanting to monitor their performance so they can make **smarter decisions across the organization**.
- Farms looking to **improve their long-range forecasting** for better business planning of sales and production.

Benefits

Real-time data collection of feedings, mortalities, health status and environmental parameters so you can monitor farm activities anytime, anywhere.

Efficient stock management with a daily updated view of your stocks so you can have full control over fish or shrimp inventory and make informed decisions about production and sales.

Production planning to define harvest and stocking plans and create precise budgets.

Full traceability from egg to harvest to maintain credibility, foster customer trust and meet regulatory requirements.

Better business intelligence through automated reporting, data visualization and forecasting features that enable users to streamline data analysis and timely forecasts.

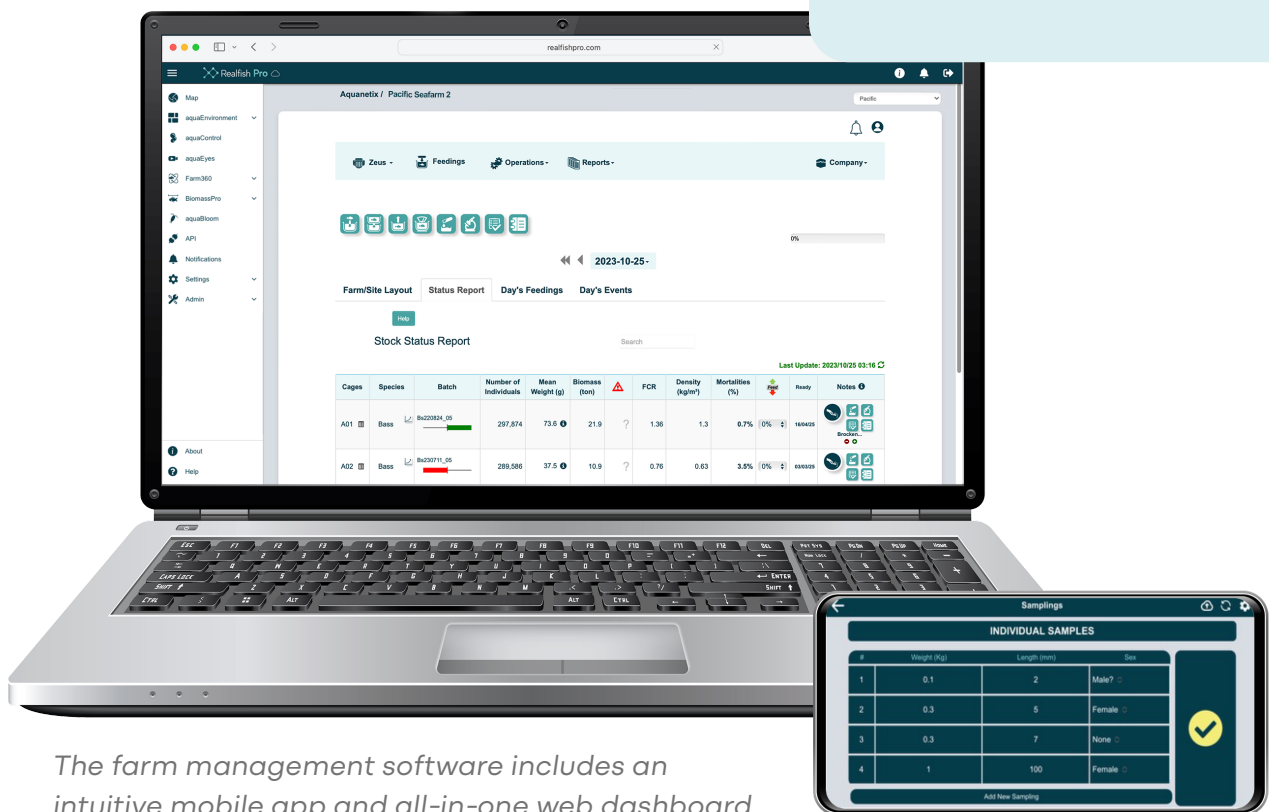

Key Features

- Intuitive mobile app
- Web dashboard showing the farm overview
- Algorithms for stock status, feeding, biomass and forecasting
- Livestock management
- Inventory management of feed, nets and chemicals
- Production planning
- Full traceability
- Task planner
- Health alerts
- Customized reporting
- Secure cloud access

Farm360 enables farm owners and operators to optimize production, lower costs and maximize profitability.

Pair with:

- aquaMeasure wireless sensors
- BiomassPro
- aquaEyes video streaming software
- FlowFeeder waterborne feeding system

Who we are

Fueled by a commitment to a more sustainable future, Innovasea is at the forefront of pioneering technologies that transform our industry, protect the oceans, and feed our world. We deliver fully integrated solutions, backed by a team of experts, to ensure users get the most out of their equipment. Together, this work advances our mission of blending innovation with environmental stewardship and global advocacy.
